

Online Course Offerings

The Office of Dual Enrollment is pleased to offer **over 80 online courses** from **over 30 academic disciplines**. Courses are offered in one of two formats:

Online Learning Group: "OLG" courses encourage students to interact weekly with their classmates and instructor. Students start the course, work through assignments, submit weekly work, and finish the course collectively with their classmates. OLG courses require personal accountability due to weekly deadlines, but do not require virtual meeting times.

Independent Study: "IS" courses allow students to operate independently of classmates, weekly deadlines, and regular interaction with an instructor. Students may work on their IS course at their own pace, with all coursework due at the end of the semester.

Regular access to internet throughout the term is required for all courses. Course availability is dependent upon enrollment and subject to change. Questions? Please contact the Office of Dual Enrollment at de@unwsp.edu.

Traditional Undergraduate & Adult Undergraduate Students: Please reference the current Traditional Undergraduate & Dual Enrollment Course Catalog for additional relevant information about each course.

Course	Title	Credits	Terms	Description
BIO1025	Medical Terminology	2	Fall Spring Summer	A concise course that provides practice in the definition and use of medical terms. The course includes the analysis of words based on combining forms, prefixes and suffixes. Intended to fulfill the admission requirement for many health profession graduate programs; also benefits pre-medicine and pre-dentistry students. OLG, PSEO
BUS1115	Introduction to Spreadsheets	2	Fall Spring Summer	Students are introduced to spreadsheets through a hands-on experience. Students will learn to create and manipulate spreadsheets, enter formulas, copy and edit cell entries, create graphs, sort data, and print. The spreadsheet skills learned in this course are applicable in other business courses as well as being essential to employment opportunities. OLG, PSEO
BUS2011	Introduction to Business Analysis	2	Fall Spring Summer	This course provides an introduction to frequently used data analysis techniques that can aid business decision making. Data capture, processing, analysis, and presentation techniques will be introduced. Excel and other relevant software tools will be used to perform basic data analysis. OLG, PSEO
CHE1006	Concepts of Chemistry PQ: One year of high school algebra (two years recommended) CQ: CHE1006L	5	Fall Spring Summer	A survey of chemistry and its applications, intended to promote understanding and literacy in the sciences in general and especially in the field of chemistry. Topics studied include the scientific method and its relationship to faith and reason; matter and energy; atomic and molecular structure; chemical bonding and intermolecular forces; chemical formulas and equations; water, acids and bases; oxidation-reduction reactions; and chemistry around the house. Students carry out the experiments at home using a small kit supplied by the campus store and readily available equipment, supplies and chemicals. OLG, PSEO

Course	Title	Credits	Terms	Description
COS2005	Python Programming	4	Fall Spring	This course uses a popular computer language for the development of many types of computer applications. Topics include program design, program structure, debugging programs, computer language syntax, computer commands, assignments and expressions, system inputs and outputs, variables, data types, loops and structured control. The course continues with additional topics such as object types, numerical types, strings, lists, using files, data analysis, functions, scope of variables, arguments, modules, object-oriented programming, exceptions, and developing larger applications for data analysis. OLG, PSEO
COS2071	Programming I - Java PQ: COS2005	4	Fall Spring	This course introduces event-driven computer programming using a graphical user interface and object-oriented language. Topics include classes/controls, objects, events, methods, properties, syntax, program structure, data types, functions, loops, conditional statements and connecting to a database. OLG, PSEO
CRJ2125	Criminology	4	Fall Spring	An examination of the extent and nature of crime in the United States. Attention is given to theories of crime causation and an analysis of the social processes leading to criminal behavior. OLG, PSEO
DAL2012	Introduction to Data Analytics PQ: BUS2011 or MAT2055	2	Fall Spring	This course provides an introduction to simulation and optimization techniques that are foundational to data analysis and real-world decision making. Topics include time series analysis, linear and non-linear optimization, decision analysis and Monte Carlo simulation. Applications in business, sports, medical and other contexts will be included. Course	Title	Credits	Terms	Description
GEO1007	Principles of Geography	3	Fall Spring	An introduction to the study of the interrelation of human and physical geography. Attention is directed to geographical concepts, maps, physical geography, population geography, cultural geography, political geography, agricultural and economic geography. OLG, PSEO
GEO1017	Principles of World Geography	3	Fall Spring	An analysis of the global perspective of peoples and places in a political and economic geographical context. Topics include the study of the various geographical regions of the world with attention paid to the particular aspects of each region's peoples, cultures and economic development. OLG, PSEO
GST1015	Basic Computer Applications	1	Fall Spring	This class teaches basic computer literacy and introduces students to common desktop applications such as word processing, spreadsheets, Internet and multimedia. Software specific to the course includes Microsoft Word, Excel, Internet Explorer and PowerPoint. Skills gained in the course will provide a foundation for using these applications in other Northwestern courses. OLG, PSEO
GST1035	Discovering Majors	1	Fall Spring	This experientially based course is recommended for students who are undecided about an academic major and who are motivated to explore options. Students will explore both the concept of a college major and the content within the major to understand how majors relate to careers. Students will learn about major/career decision making strategies, research and evaluate majors they are considering and rank their major choices based on what they have learned. Finally, students will critically reflect on their decision making process and create an action plan for further exploration. OLG, PSEO
