ADULT UNDERGRADUATE PROGRAM

The Adult Undergraduate program offers a variety of degree options designed for busy, working adults since courses are offered online and at an accelerated pace (see [“Academic Information & Standards—Course Registration—Modality Definitions”](#)). Students may select from certificates, Associate degrees, and Bachelor’s degrees.

Core Curriculum

Purpose of the Core Curriculum

The Core Curriculum (general education) at University of Northwestern – St. Paul provides a structure through which the educational philosophy of the institution is achieved. Grounding all intellectual inquiry in the truth of the Bible and God as the Ultimate Reality of the universe requires exploration of the following three critical questions, all of which find their answer in Christ.

- What is real? Christ is the foundation of all reality (Col. 1).
- What can we know? Christ is the source of all knowledge (Col. 2).
- How should we live? Christ is our model (Phil. 2).

The Core Curriculum seeks to support students in developing a deep understanding of these truths and in applying them in their lives and within a variety of disciplinary contexts. The transformative process of “becoming like Christ for God’s glory” is at the center of all intellectual inquiry at Northwestern. The Core Curriculum provides a foundation for this inquiry, which is later expanded within the specific academic discipline.

Meaning of “Become like Christ for God’s Glory”

The Scriptures teach us that the ultimate purpose of all things is the glory of God. Whether in small things like eating or drinking (I Cor. 10:31), or important things like doing good works and living godly lives in our bodies (Matt 5:16, I Cor. 6:20), our adoption through Jesus Christ has the glory of God as its goal (Eph. 1:12). For this reason, near the end of his ministry Jesus prayed, “Father, glorify your name!” (John 12:28). All creation exists to bring glory to God—even nature itself (Ps. 19:1)—and as His children we are called to reflect that glory. But what is the glory of God? When Moses encountered God, he asked to see God’s glory. God’s response was that He would show Moses His goodness, proclaim His sacred Name, and have grace and compassion on whomever He wills (Ex. 33:18-19). Thus, the glory of God is the manifestation of His divine attributes, especially His sovereignty, goodness, grace, and compassion. Furthermore, Jesus told His disciples that the Father is glorified when we bear fruit (John 15:8).

How is it that we are able to bear fruit that leads to the glory of God? We are not able to do this on our own, because apart from Christ we are dead in our trespasses and sins (Eph. 2:1). For this reason, the Gospel calls all people to turn to God in repentance and believe in the Lord Jesus Christ (Acts 20:21), which leads to forgiveness and sanctification (Acts 26:18). After entering into this new life in Christ, we must be filled with the Holy Spirit to develop the Christian virtues known as the fruit of the Spirit (Eph. 5:18 and Gal. 5:22-23). The work of the Holy Spirit and the word of Christ (Col. 3:16) then result in our transformation into the image and likeness of Christ (Rom. 8:29; II Cor. 3:18; Eph. 4:13). Thus, to give God glory is to make the invisible God visible by manifesting the life of Christ through the fruit of the Holy Spirit.

Structure of the Core Curriculum

The structure of the Core Curriculum allows all students to engage in the following areas of learning:

- **Foundational Skills:** Coursework is designed to provide foundational skills in effective oral and written communication and information literacy, recognizing that these are essential skills across academic disciplines.
 - **Biblical Thinking & Living:** Students are provided with opportunities to study Scripture in depth, to develop interpretive skills, and to wrestle with difficult theological and philosophical questions that allow them to articulate a Christian perspective on personal, academic, religious, and social issues that is grounded in biblical truth. Transformation into the image of Christ is at the center of this study and allows students to confidently step into the challenging conversations that we all encounter in a secular society.
 - **Leadership & Professionalism:** Students complete a two-course sequence in leadership development that examines the integration of personal spiritual formation, biblically based leadership, professional skills, and cultural and global engagement. A focus on individual strengths and motivations and their impact on calling and career is included.
 - **Cultural & Global Engagement:** Students develop an understanding and appreciation of their own and others’ historical, societal, and cultural perspectives. Skills in intercultural competence, thoughtful civic participation, and responsible global engagement with a biblical mindset are emphasized.
 - **Broad Exposure to Academic Disciplines:** Recognizing that professionals need skills from a variety of academic fields, students are given the opportunity to explore a broad range of courses from different disciplines. These include academic areas such as the humanities, the arts, social sciences, mathematics, and natural sciences.
-

Undergraduate Certificates

Undergraduate certificates are designed for individuals who want to build expertise in a specialized field to update their professional profile, advance their career, or expand their knowledge. Certificate programs take about one year to complete, are cost effective, and all of the credits may apply toward a subsequent Bachelor’s degree if students want to continue their studies.

Certificate in Healthcare Management

The Certificate in Healthcare Management is designed to prepare students for careers in the expansive healthcare industry. Students will be equipped to be competent contributors in the healthcare industry by exploring the unique people, processes, and philosophies of healthcare settings. This learning is facilitated through practitioner-led coursework in healthcare-specific courses in management, leadership, law and ethics, and finance systems.

- This certificate is granted upon successful completion of the required courses and 18 credits.

Computer Science (A.S.)

The Associate of Science in Computer Science is designed to give students the knowledge to develop and use computer algorithms and computer software. In addition, students will learn computing and mathematical principles that are used in the design of such systems. Students are provided with the mathematic fundamentals of computers and computer programming. Students completing this program are prepared to function effectively as software developers and information technology consultants. A.S. graduates are able to transition into one of the existing B.S. programs or pursue an undergraduate degree at another institution.

- This A.S. degree is granted upon successful completion of the required courses and 60 credits.

CORE CURRICULUM 30–33 CREDITS

All approved Traditional Undergraduate courses will apply to the corresponding category. Related transfer credits may apply if approved.

Business Administration (B.S.)

The Bachelor of Science in Business Administration is designed to prepare students for a variety of management careers in for-profit firms or nonprofit organizations. Business graduates frequently join small companies or return to manage family businesses. Students complete a well-balanced program in business administration and are able to customize their electives or declare a concentration.

- This B.S. degree is granted upon successful completion of the required courses in Core Curriculum (general education), major/minor coursework, and electives for a 125 total credits. Overall, 40 credits must be in upper-level (3000 and above) courses.

Healthcare Management (B.S.)

The Bachelor of Science in Healthcare Management is designed to prepare students for management and leadership roles in healthcare organizations. Coursework provides practical teaching in navigating healthcare ethics, understanding public health issues, serving diverse populations, and learning the unique financial systems of the healthcare industry. Courses are taught by professionals in the field, giving students a competitive advantage over others with general business or management training. This degree serves as a foundation for further study or formal certification in hospital administration, and it provides an alternative for students seeking advancement in the healthcare field beyond the direct care experience.

- This B.S. degree is granted upon successful completion of the required courses in Core Curriculum (general education), major/minor coursework, and electives for a 125 total credits. Overall, 40 credits must be in upper-level (3000 and above) courses.

	OR BIB4360 (4 cr)	
Electives	BIA, BIB, or PHI Courses	4 cr

Selected course(s) may not be used to also satisfy Core Curriculum requirements; credits must be unique.

Accelerated Graduate Track (Dual Degree) Option

Students may apply to the accelerated graduate track by submitting an application acquired via their Academic Advisor after completing a minimum of 45 undergraduate credits. If approved by the A&GS Office and Program Manager, students will take the listed graduate-level courses (graduate tuition and policies apply) instead of the listed undergraduate courses. All graduate-level courses taken as an undergraduate student must be completed with a grade of C or better to satisfy graduate degree requirements. This option will save time and money because the credits may apply toward both the Bachelor of Science in Ministry and the Master of Arts in Ministry Leadership (MAML). Upon completion of the undergraduate degree, students must follow the admission process to be officially admitted to a graduate program.

UNDERGRADUATE COURSES 14 CREDITS

MIN2016	Biblical Interpretation for Study	2 cr	Electives	MIN Courses	4 cr
	OR BIA1015 (2 cr)		Electives	BIA, BIB, ICS, or MIN Courses	6 cr

Psychology (B.S.)

The Bachelor of Science in Psychology equips students with a theoretical and applied understanding of psychological principles to prepare them for graduate study in psychology, entry-level positions in the helping professions, or careers requiring a psychology background. Biblical coursework enables students to apply psychological principles from a Christian perspective. Students are encouraged (though not required) to declare a concentration.

The concentration in *Health Psychology* provides students with the theoretical background of how psychological, behavioral, cultural, and social factors influence health and wellness. Attention is given to the role of stress and lifestyle choices and how they affect our well-being; stress and pain interventions are also addressed.

The concentration in *Marriage and Family* examines foundations for family communication, problem solving, and relationships; a systems perspective on family dynamics and their impact upon marital quality and the family; as well as counseling and intervention strategies.

- This B.S. degree is granted upon successful completion of the required courses in Core Curriculum (general education), major/minor coursework, and electives for a 125 total credits. Overall, 40 credits must be in upper-level (3000 and above) courses.

REQUIRED PSYCHOLOGY COURSES 18 CREDITS

+ 8 major credits that are applied to Core Curriculum
